

# Get the Bonafide™ Advantage

**Our new look Premium race feeds XLR8 and Formula 3 now have an even greater margin over the other runners**

XLR8 and Formula 3 now contain Bonafide™ – the new, world first Vitamin K supplement that provides support for the skeletal system and may assist in the development and maintenance of healthy bone density.

With an established correlation between bone density and the incidence of DMD (shinsoreness) in 2 year olds, Bonafide™ may just hold the key to keeping your 2 year olds on track.

## **XLR8**

- Oat free complete feed with Protexin™
- The first choice of Melbourne Cup winning trainer Mark Kavanagh

## **Formula 3**

- Australia's No.1 oat free race feed.

## **Bonafide™**

Visit our informative website and register to receive results of ongoing trials and learn about the critical effect that Vitamins K1 & K2 have on the function of Osteocalcin, the bone protein that binds the mineral and protein in bone together. Without sufficient Vit K the binding process is incomplete and low density or defective bone and cartilage may be produced.

**Bonafide™ is the first product to provide a stable, bio-available form of Vitamin K 1 & K2**
