

## The most robust horse fence rail available – Australian “through and through” for more than 25 years.

Flexafence is a heavy duty HDPE plastic rail with high tensile wire reinforcement along its length. It is 120mm wide and supplied in 100m, 90m 80m and 70m rolls.

Excellent UV resistance proven over many years of “infield” exposure and user satisfaction in Australia.

Horses and riders are protected from impact trauma as energy is absorbed through elastic deflection which brings the animal to rest gently.

Users of flexafence report major reductions in VET bills as a direct consequence of the application of flexafence.

Flexafence is low maintenance, long lasting, easy to install, affordable, readily available and, above all, it is Safe.
